## INTRODUCTION

KICK AND RUN is a realistic soccer game. It contains every aspect of the actual game, dribbling, passing, heading the ball, shooting, throw-ins. The game may be played by one to four players.

With one coin you play against the computer, with two coins two players play against the computer, or each other. With three coins two players play against one player, with four coins two players play against two other players.

You can select which international team you wish to be, and play against the others. Each team has its own individual style of play and level of skill. Some are great passing teams, others are hard shooters, yet others have great play making skills, some play fast, others slow.

There are three basic controls for each player, JOYSTICK, PUSHBUTTON and a KICK SWITCH.

During play one or more must be used, some at the same time to provide action. The following table shows which to use and when.

	JOYSTICK	PUSHBUTTON	KICK SWITCH
PLAYER MOVEMENT	*		
LINE PASS	*		X
FLY PASS	*	0	
OVERHEAD PASS		0	X
SHOOT	*		X
HEADER	*	0	
SLIDING TACKLE			X

FREE KICK (LINE)		0	X
GOAL KICK	*	0	X
CORNER KICK	*		X

## GAME INSPECTION

KICK AND RUN is ready to play when received. You should however carefully inspect the game. This is to insure that the game is in perfect condition. Be sure to verify the following before turning the game on.

Examine external cabinet for chips, dents or broken parts.

Open rear access door and check:

Plug-in connectors to see that they are firmly seated.

Speaker connections.

All player control connections.

For loose components on P.C. boards.

Fuses, making sure they are firmly in holders.

Coin mechanisms.

For loose foreign objects, especially metal, screws or parts which might cause electrical problems.

The video monitor is properly adjusted before shipping, if there are any adjustments necessary, refer to our video monitor manual (72-00016-001).

If problems occur or technical assistance is required, contact our customer service department at (312) 520-9280.

## POWER REQUIREMENTS

The game is shipped ready for operation at 120VAC, 60Hz with a power consumption of approximately 250 watts, foreign shipped games operate at 220VAC 50Hz.

### CAUTION

FOR SAFE OPERATION IT IS RECOMMENDED THE CABINET BE GROUNDED. THIS GAME IS EQUIPPED WITH A THREE CONDUCTOR POWER CABLE. THE THIRD CONDUCTOR IS THE GROUND CONDUCTOR AND WHEN THE CABLE IS PLUGGED INTO AN APPROPRIATE RECEPTACLE, THE GAME IS GROUNDED. THE OFFSET PIN ON THE POWER CABLE'S THREE-PRONG CONNECTOR IS THE GROUND CONNECTION

## LOCATION SPACE REQUIREMENTS

DEPTH 39½"

WIDTH 29"

HEIGHT 70-¾"

WEIGHT 300 pounds

## GAME INSTALLATION

The following precautions should be followed when installing the game.

Avoid rough handling of game, the picture tube is fragile. Game must be installed level, as the players will be stepping hard on the kick switch.

Avoid installing the game where it may receive excessive sunlight or heat, to prevent a rising internal temperature.

Do not install in a damp or dusty location.
